 janakparmar.vercel.app

MERN Stack Developer with hands-on experience in React.js, Node.js, Express.js, and MongoDB. Skilled in building responsive web applications, REST APIs, JWT Authentication, and CRUD operations. Looking for an opportunity to contribute and grow as a Full Stack Developer.

PROJECTS

User Management System (React CRUD with localStorage)

- **Automated Admin Provisioning:** Developed an intelligent scaffolding logic where the very first registered user is automatically assigned the **Admin** role with an active account status, while all subsequent registrations default to the **Normal User** role.
 - **Status-Based User Approval System:** Integrated a security layer ensuring new user accounts are created as Deactivated by default. Implemented strict route guards in Login.jsx to block deactivated users and prompt them to contact the admin.
 - **Full Administrative CRUD Panel:** Created a robust dashboard interface featuring a clean Tailwind UI data table. Authorized admins can dynamically **Read** the global user list, **Update** sensitive fields (Name, Email, Phone), and toggle account statuses (Active/Deactivated) using custom radio buttons.
 - **Safe State & Storage Manipulation:** Engineered functional state flows utilizing JavaScript array utilities like `.map()` for data updates, `.filter()` for user deletion, and `.some()` for preventing duplicate email registration.
 - **Session & Navigation Management:** Managed independent client-side routing utilizing react-router-dom and securely tracked active sessions via currentUser browser storage tokens to enforce clean logout workflows.

JWT Authentication System (Node.js + Express + MongoDB + JWT + bcrypt)

- Developed a secure login and signup system using Node.js, Express.js, MongoDB, and JWT.
 - Implemented password hashing and token-based authentication to manage user sessions and store data securely.
- GitHub: <https://github.com/parmarjanak9714/Role-base-ui-with-jwt> 

Personal Portfolio Website

- Built a personal portfolio website using React and Tailwind CSS to showcase my projects and skills. Integrated a functional contact form using Gmail SMTP (Nodemailer) to allow visitors to directly send messages via email.
- GitHub: <https://github.com/parmarjanak9714/react-portfolio> 

SKILLS

Frontend

- HTML
- CSS
- JavaScript
- React.js
- Tailwind CSS
- Axios

Backend

- Node.js,
- Express.js

DataBase

- MongoDB,
- MySQL (XAMPP)

Tool's

- Git,
- GitHub
- VS Code,
- Postman

EDUCATION

Bachelor of Arts (B.A.),
Maharaja Krishnakumarsinhji Bhavnagar University

CERTIFICATES

Full Stack MERN Development – Grras Solutions - Ahmedabad

LANGUAGES

- Gujarati
- Hindi
- English
