MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing REST APIs, authentication systems, and responsive user interfaces. Passionate about problem-solving and continuously learning modern web technologies. Seeking an entry-level Software Developer opportunity to contribute and grow in a professional environment.

EDUCATION

Bachelor of Arts (B.A.), *Maharaja Krishnakumarsinhji Bhavnagar University*

PROJECTS

Hang Out — Food Ordering Website

- Built a responsive single-page food ordering website using HTML, CSS, and JavaScript.
- Includes login, add/remove to cart, and order success features for a real-like food ordering experience.

Library Management System (Backend Project)

- Developed a backend application using Express.js and Node.js to manage library operations.
- Implemented CRUD functionality for books and users, including adding, updating, deleting, and fetching data.
- Used RESTful API design principles and connected MongoDB for data storage.

JWT Authentication System (Login & Signup)

- Developed a secure login and signup system using Node.js, Express.js, MongoDB, and JWT.
- Implemented password hashing and token-based authentication to manage user sessions and store data securely.

Personal Portfolio Website

- Built a personal portfolio website using React and Tailwind CSS to showcase my projects and skills. Integrated a functional contact form using Gmail SMTP (Nodemailer) to allow visitors to directly send messages via email.
- GitHub: <https://github.com/parmarjanak9714/react-portfolio>

Full Stack Chat Application

- Built and deployed a full-stack chat application with user authentication.
- Used JWT for secure login and MongoDB Atlas for cloud database management.
- Deployed frontend on Vercel and backend on Render.
- Implemented responsive UI with Tailwind CSS.
